

Plain text

```
graph TD; A[Plain text] --> B[Cipher text]; B --> C[Cipher text]; B --> D[MAC];
```

The diagram illustrates a process flow. It begins with a yellow box labeled 'Plain text'. A black arrow points down from this box to another yellow box labeled 'Cipher text'. From the 'Cipher text' box, two arrows emerge: a gray arrow pointing down to the left half of a final yellow box, and a black arrow pointing down and to the right to the right half of the same final box. The final box is divided into two sections: the left section is labeled 'Cipher text' and the right section is labeled 'MAC'.
